

book.h

```
//To simplify the implementation, a book is identified by isbn.  
#include<iostream>  
using namespace std;  
  
class Book  
{  
public:  
    Book();  
    Book(int);  
  
    int getISBN();  
    void print(std::ostream &) const;  
  
private:  
    int isbn;  
};
```
